The time period for reply, if any, is set in the attached communication.

# Office Action Summary

Application No.	Applicant(s)	
10/789,934	MIYASAKA, YOICHI	
Examiner	Art Unit	
Shamim Ahmed	1792	

The MAILING DATE of this communication appears on the Period for Reply	e cover sheet with the correspondence address
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET T WHICHEVER IS LONGER, FROM THE MAILING DATE OF THE Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no ever after SIX (6) MONTHS from the mailing date of this communication.	HIS COMMUNICATION.  ent, however, may a reply be timely filed
<ul> <li>If NO period for reply is specified above, the maximum statutory period will apply and w</li> <li>Failure to reply within the set or extended period for reply will, by statute, cause the app.</li> <li>Any reply received by the Office later than three months after the mailing date of this collection and patent term adjustment. See 37 CFR 1.704(b).</li> </ul>	dication to become ABANDONED (35 U.S.C. § 133).
Status	
1) Responsive to communication(s) filed on 26 June 2008.	
2a) This action is FINAL. 2b) This action is r	non-final.
3) Since this application is in condition for allowance except	for formal matters, prosecution as to the merits is
closed in accordance with the practice under Ex parte Qu	uayle, 1935 C.D. 11, 453 O.G. 213.
Disposition of Claims	
4) Claim(s) 1-13 is/are pending in the application.	
4a) Of the above claim(s) 7-13 is/are withdrawn from con-	sideration.
5) Claim(s) is/are allowed.	
6)⊠ Claim(s) <u>1-6</u> is/are rejected.	
7) Claim(s) is/are objected to.	
8) Claim(s) are subject to restriction and/or election r	requirement.
Application Papers	
9) The specification is objected to by the Examiner.	
10)⊠ The drawing(s) filed on <u>07 October 2004</u> is/are: a)⊠ acc	epted or b)⊡ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) I	be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is requir	
11) The oath or declaration is objected to by the Examiner. No	ote the attached Office Action or form PTO-152.
Priority under 35 U.S.C. § 119	
12)⊠ Acknowledgment is made of a claim for foreign priority un a)⊠ All b)□ Some * c)□ None of:	der 35 U.S.C. § 119(a)-(d) or (f).

### DETAILED ACTION

#### Flection/Restrictions

 Applicant's election of Group I (claims 1-6) in the reply filed on 6/26/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be neadtived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over
 Motoshi (JP-10-044399) in view of Takeshi et al (JP 2000-334965 A).

Motoshi teaches a process for inspecting an ink jet head in which an ink hole can be detected easily, wherein the ink droplet is flowing through the head, which is oscillated by imparting an oscillation to a pipe for feeding the ink to the ink jet head (see the abstract).

Motoshi also teaches that enlarged image of the nozzle forming plane of the head is then picked up by means of a camera and vibration of the image of the nozzle, which resemble as the claimed "application of a driving waveform to the liquid droplet-ejection head" (see paragraphs 0007,0008 and 0031 of the translated version of the document).

Application/Control Number: 10/789,934

Art Unit: 1792

Motoshi may not explicitly teach that the detection of the nozzle hole is performed with the application of a driving waveform that waveform causing singleperiod moicromotion of a meniscus surface of the nozzle hole.

However, Takeshi et al teach a nozzle forming member having good discharge characteristics at a narrow pitch and to form with a good manufacturing yield by forming different angles between an ink discharging direction and a tangential direction of an inner periphery of a nozzle hole at discharge and inflowing sides, and forming the hole having a site continuously changing at its angle and thus, a meniscus position of an ink droplet can be easily controlled, discharging characteristics and directivity can be easily controlled by a surface tension of a discharging surface and an edge effect of the discharge port end (see the abstract).

Therefore, it would have been obvious to one of ordinary skilled in the art at the time of claimed invention to employ Takeshi et al's teaching into Motoshi's teaching for easily controlling the meniscus position of the ink droplet as suggested by Takeshi et al.

As to claims 2 and 5, as discusses above that the meniscus position of the droplet is easily controlled, so, it would have been obvious to generate a motion that causes pulling the meniscus surface as claimed.

#### Conclusion

 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shamim Ahmed whose telephone number is (571) 272-1457. The examiner can normally be reached on Tu-Fri (12:30-10:30) Every Monday Off. Application/Control Number: 10/789,934

Art Unit: 1792

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine G. Norton can be reached on (571) 272-1465. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
